

TOPTUBE BAG

Mounting instructions.

Please note: Attaching bags to your bike may cause damage to its paintwork. To protect against wear and tear, we recommend applying protective tape over attachment points on your bike's frame before using any bags.

1. Attach lower two velcro loops (A) towards top tube and front velcro with velcro protective tape (B) towards headset. * If velcro straps are to long, trim to adapt.

2. Or use screws & washers (follow bike manufacturers recommended torque) to attach on top tube (C). Add velcro loop (B) to headset & velcro (A1) for extra stability if needed.

3. Use EVA foam spacer (D) towards headset if needed.

4. Use free velcro slots (E) towards headset as exit for accessory cables.

5. The Top Tube Bag can also be used towards seat post. If so, you can use the top slots (E1) for the velcro loop towards seat post.

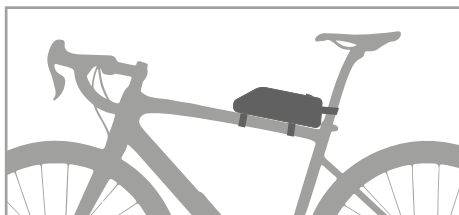

6. Max. load 1kg/2.2lbs

7. Zipper Care instructions: Zipper should be cleaned and lubricated regularly. Clean with zipper specific cleaning fluid, or mild soap and water along with a soft brush (ie a tooth brush). Zipper should be completely dry before applying lubricate. Use zipper recommended lubricant.

*Fixed velcro towards moving headset might cause chafing.

TOPTUBE BAG

Mounting instructions

! **WARNING!** Install, open or access the bags only when the bicycle is not in motion. Doing so while riding can make you lose control and fall and can result in serious injury. **WARNING!** Before riding with any bags, make sure they are securely installed, and all cargo items are securely stored. Failure to do so may result in bags coming loose or items falling out, both of which can make you lose control and fall and can result in serious injury. Adding cargo to your bicycle may affect its handling. Before your first ride, you should practice riding with a cargo bag installed and loaded in a controlled environment away from traffic.
